Working Assignments for  
The CODIB Ad Hoc Task Team on Photo Chip

Existing Photo Information Collection, Processing and Using Systems

Task Team<sub>1</sub> - Answer the factual and functional questions under I of the Terms relating to activities outside the Intelligence Community. *2 copies*

Task Team<sub>2</sub> - Answer the factual and functional questions under I of the Terms relating to activities inside the Intelligence Community. *3 copies*

Task Teams<sub>1&2</sub> - Answer those questions under I of the Terms that relate to relationships between Community and non-Community groups active in the field of Photographic information collection, dissemination, exploitation and end-product use.

NOTE - Plus such other questions and comments which arise and which in the Task Team's judgment appear relevant to these aspects of the Photo Chip inquiry.

Photo Chip Systems - Existing, in R&D, in Planning

Task Team<sub>3</sub> (Army), Task Team<sub>4</sub> (Navy), Task Team<sub>5</sub> (Air Force), Task Team<sub>6</sub> (DEA), Task Team<sub>7</sub> (State), Task Team<sub>8</sub> (FBI), Task Team<sub>9</sub> (AEC), Task Team<sub>10</sub> (CIA operating

department) Task Team<sub>11</sub> (CIA-DEA coordinating org)

- 2 -

Each Task Team would answer the factual, functional and projective questions  
3-10

under Terms II, plus any other questions or comments arising from the inquiry.

Task Team would weave together the reports, add an overall appraisal and  
11

analytic interpretation as appropriate.

Present and Prospective Requirements for Photographic Information and Photo Chips

Task Team (PI type and operational application requirements)  
12

Task Team (General analytic, special product and general reference or  
13

support requirements)

Each Team will answer the factual, functional and interpretative questions  
under Terms III, plus the results of any further inquiries that appear relevant  
to the Photo Chip problem.

Task Team should be staffed by people from present PI organizations and  
12

from operating-user components. Task Team might well be referred to COMOR  
13

Chairman for leadership, with research being done by people from FTD, from the  
Combined Targets Staff at Offut Field and from CIA's economic and from scientific  
and technical analytic offices, etc.

Exploitation Policy and Procedures for Photographic Information

Task Team would answer the factual, evaluative and projective questions  
14

under Terms IV. It should probably be led by someone from an all-source analytic organization, with a staff embracing people from both PI and general analytic shops. COMOR might well play a role.

Possible Benefits From Photo Chip Standardization

Task Team will concentrate upon (content value and use) under Terms V.  
15

Task Team will concentrate upon (efficiency and economy) under Terms V.  
16

Task Team will concentrate upon (countervailing impacts) under Terms V.  
17

Constraining Factors

Task Team will concern itself with (Technology) under Terms VI.  
18

Task Team will concern itself with (Policy, Security and Customs) under  
19

Terms VI.

Task Team will address the questions regarding (Chemistry) under Terms VI.  
20

In general, the Chairman and Secretary will serve as assistants and guides to all operating Task Teams, will arrange for initial review, evaluation and consolidation points of all responses to the Terms, and will provide overall
